PROFESSIONAL SUMMARY

Senior Full-Stack Developer & Team Lead with 11+ years delivering production SaaS platforms, REST APIs, and AI-integrated products across e-commerce, healthcare, sports, and education domains. Core stack: Laravel, Node.js, React, Next.js, TypeScript, AWS. Experienced with Docker, CI/CD, microservices architecture, and leading distributed engineering teams in Agile environments. Known for owning backend systems end-to-end — from architecture design to production deployment — with a strong focus on system performance, clean architecture, and measurable business impact.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript, HTML5, Tailwind CSS

Backend: Node.js, Laravel, PHP, Express.js, Fastify, Bun.js, REST API, GraphQL

Databases: MySQL, PostgreSQL, MongoDB, Redis, Cassandra, ClickHouse, Qdrant

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, CloudFront, Bedrock), Docker, CI/CD, Git, Linux, RabbitMQ, Kafka

AI & Tooling: Claude API, MCP Servers, Autonomous AI Agents, RAG Pipelines, Prompt Engineering

Other: Agile/Scrum, System Design, Microservices, Code Review, Team Leadership, Mentoring

WORK EXPERIENCE

Team Lead & Senior Full-Stack Developer — Pranshtech Solutions

2022 – 2025 | Laravel, Node.js, MySQL, AWS, Redis

- Led a team of 5 developers — sprint planning, code reviews, architecture decisions, and delivery across Agile sprints
- Sole backend developer for Textdrip (high-volume SMS SaaS) processing 100K+ messages daily — owned full backend from day one
- Designed RESTful APIs, queue systems (RabbitMQ), and drip-campaign scheduling handling 10K+ concurrent jobs
- Reduced API response times by 40% and maintained 99.5% system uptime across the full stack

Senior Full-Stack Developer — Nyusoft Solutions

2018 – 2022 | React.js, Node.js, Laravel, MySQL

- Built 7+ production web apps serving 50K+ combined monthly users across sports, education, real estate, and recruitment
- Integrated third-party APIs, payment gateways (Stripe, PayPal), and real-time messaging systems
- Mentored 4 junior developers; authored internal engineering standards and code review practices

Senior PHP / Laravel Developer — iDevTechnolabs

2014 – 2018 | PHP, Laravel, CodeIgniter, MySQL

- Developed 10+ client web apps using Laravel and CodeIgniter following MVC/SOLID principles
- Built RESTful APIs handling 5K+ daily requests with third-party integrations for diverse client briefs

EDUCATION

Master of Computer Applications (MCA)

Gujarat Technological University — 2015

Bachelor of Computer Applications (BCA)

Gujarat University — 2012

KEY PROJECTS

Textdrip — SMS Marketing SaaS (Laravel, Node.js, AWS, Redis) — Ongoing

High-volume drip campaign platform. Owned complete backend — system architecture, campaign automation engine, queue management, RESTful APIs, and messaging workflows processing 100K+ daily messages at scale.

Quantum Autofill — Browser Extension (JavaScript, WebExtension APIs) — 2024

Chrome and Firefox extension for intelligent form auto-fill. Built with modern WebExtension APIs, published on Chrome Web Store and Firefox Add-ons with companion docs site.

GMX — B2B E-Commerce Platform (React.js) — 1.5 Years

B2B marketplace for retailers and sellers. Built dual-sided order management, real-time status tracking for buyers/sellers, and in-app messaging serving 200+ active business accounts.

SoundBNB — Studio Booking Platform (React.js) — 1.5 Years

Airbnb-style booking for recording studios, events, and photo/video shoots. Built dynamic booking flows with configurable add-ons, availability calendars, payments, and host-guest messaging.

SmartVerc — AI Portfolio Management (React.js, Node.js) — 10 Months

AI-powered investment platform. Built analytics dashboards, risk scoring, automated rebalancing suggestions, and personalized portfolio insights at scale.

Odds Beater — Sports Betting Comparison (React.js, Node.js) — 1 Year

Dutch market odds aggregation platform. Built full frontend + backend integrations for live multi-sport odds across football, tennis, and more from major bookmakers.

Winkhire — Recruitment Platform (React.js, Laravel) — 1 Year

Modern recruitment marketplace. Built candidate-employer matching, application tracking with pipeline stages, resume parsing, interview scheduling, and real-time recruiter-candidate chat.

WorknStay — Short-Term Rental Marketplace (React.js) — 1 Year

Rental platform for remote-work-friendly stays. Built listing management, dynamic pricing calendars, multi-step booking, host/guest dashboards, reviews, and integrated payment processing.

Loncani — Salon Marketplace (React.js) — 10 Months

End-to-end salon booking marketplace. Built stylist profiles with portfolios, time-slot appointment booking, availability management, payment processing, and review/rating systems.

Teachers Australia — Tutoring Platform (Laravel, CodeIgniter, Symfony) — 1 Year

Platform connecting Australian students with tutors for in-person and online sessions. Built advanced search, real-time tutor tracking, session booking with calendar sync, and lesson-pack purchasing.

ProtechDNA — Genetic Testing Platform (React.js) — 8 Months

DNA analytics platform for clinicians and consumers. Built test-kit ordering flows, lab-integration pipelines, secure HIPAA-conscious result dashboards, and personalized genetic health reports.
